

I am requesting that as you prepare to establish rules nationwide for TeleMarketing callers that you consider what we currently have in Indiana. I had my name removed from the telemarketing list and since then my unsolicited calls have decreased from approximately 25 per month to no more than 2. This has greatly reduced the harassment factor for my family. We ask that as you look at a nationwide ruling that it be at least as good for the home owner as what we have in Indiana. We do not want telemarketing callers to bug us to death in our own homes.

Thank you,
Raymond Friend
